

AIR CHECKBAC™

THE SMART SOLUTION FOR REMOTE ALCOHOL MONITORING

AIR CheckBAC™

Corrisoft now offers AIR CheckBAC™, an alcohol monitoring service that integrates with the AIR product portfolio.

AIR CheckBAC™

- CheckBAC™ is a Bluetooth® enabled, fuel-cell breathalyzer that works in conjunction with a smartphone app.
- The CheckBAC system is integrated with the AIR Mobile smartphone to provide both 24/7 GPS and alcohol monitoring.
- The CheckBAC app video records each test, reports the GPS location, and uses facial recognition technology to verify the test taker.
- Agencies can also use CheckBAC™ to complement the AIR Check-In app.
- CheckBAC™ costs up to 80% less than other solutions and is more discreet than most models.

How does it work?

Once the participant blows into the CheckBAC™ device, results are immediately uploaded to the agency's portal. The agency then has the ability to review results and respond accordingly.

**Configurable
per participant**

**Reporting
feature**

**Randomly
test day or
night**

**Scheduled
and repeat
testing**

Let's get started!

If you would like to include the CheckBAC™ device in conjunction with your AIR App and Devices, contact us at 800.247.2930.
